

SR-600

Robust, durable and stylish

With its small footprint and low profile design, the SR-600 complements any retail or hospitality environment. An in-built cable management system frees additional serving space on the countertop. Robust and easy to clean, with a waterproof touch panel, the SR-600 is ideal for restaurants and bars where spilled drinks and food debris are everyday hazards for any EPoS hardware.

Easy to use touch technology

The SR-600's large, adjustable touchscreen is fast, easy and comfortable to use. It is so intuitive that the most complex promotional offers can be navigated quickly and easily, even by inexperienced operators. The crisp TFT display is ideal for brightly lit environments such as pharmacies and fast food outlets.

Powerful, open and flexible

Powered by a high performance Intel processor, the SR-600 enables you to easily deploy a wide range of applications, including PoS, stock control, staff scheduling and promotions. It is a totally open platform for the most sophisticated hospitality and retail systems, including DOS, Windows, Internet and multimedia software. As a result, adding any of a wide range of peripherals, such as a new cash drawer or a magnetic stripe reader couldn't be easier. The SR-600 also has a wide range of interface options, including serial and USB ports, as well as the speed, flexibility and cable efficiency of Ethernet connectivity. In fact, thanks to today's advanced Ethernet networks you can link the SR-600 to remote printers, or share a single printer between several terminals.

SR-600 technical specification

CPU	Intel Celeron 733MHz
Memory	168-pin DIMM slots x 2 (512MB max)
Storage	1 HDD 2.5" Type CD-ROM Drive 24 x speed slim drive x 1 (alternative option) Front CompactFlash card slot (or adaptor) x 1 (alternative option) FDD External option
Slots	PCI x 1
I/O Ports	COMPORT x 3 Parallel port x 1 USB port x 2 Ethernet port x 1 K/B & Mouse port x 1 PS / 2 Drawer port for 2 cash drawers CRT x 1
OS Supported	Windows 2000 Professional, WindowsXP Professional Windows XP Professional and Windows 2000 Professional available as optional pre-installed OS.
Size	306(W) x 303(D) x 278(H) mm (at highest angle, including rubber feet, excluding LCD clamp)
Customer display options	Integrated 20 columns x 2 lines VFD 256 x 64 dot graphic display
LCD with touch panel	12.1" TFT SVGA (800 x 600 with resistive-film touch panel)
